

**Meeting re Pilgrim Power Station  
Jones River Watershed Association, EPA, MA DEP, MA CZM  
June 15, 2012**

Desired Outcome

Better understanding of each organization's current concerns and positions

Draft Agenda

1. Introductions
2. Jones River Watershed Association
3. EPA
4. DEP
5. CZM
6. Discussion

Items below will be addressed by relevant organizations:

1. What is EPA's response re: expired NPDES permit in light of new regs out, NRC relicensing, NMFS May 17 conservation recommendations.
2. What is DEP's response re: CWIS regs and state authority to issue separate permit and revoke 401cert?
3. CZM: we will be asking for CZM to reconsider its refusal to reopen the 2006 certification, in light of the relicensing and new information from NMFS and others. We would like CZM to explain how killing river herring and other species is consistent with state CZM program.
4. Please explain what happened with thermal backwash malfunction that caused emergency shut down in mid May. What were discharges to CCB? Cause of malfunction?
